

Smart Gateway WR-8001-SG

LIVE SIMPLE
LIVE SMART

Description

Wretro's Smart Gateway is the hub which sends RF signals all the Wretro modules & switches and receive commands from mobile app. The gateway is the transceiver between the switches and the mobile app and gets connected over Wi-Fi. Smart Gateway accepts commands over internet through Cloud which allows you to control your home from anywhere. When connected to Local network, it works without internet as well. It is a sleek stylish and elegant unit meant for the millennial lifestyle.

Main Features

- 1) Built in Wi-Fi, supports 802.11 b/g/n standard.
- 2) Supports upto 16 scenes, 64 devices, 128 bindings.
- 3) Multi platform app - Android / iOS.
- 4) Stylish Interface.
- 5) Scheduling & Voice Command feature (Alexa)
- 6) Built-in cloud service.
- 7) Supports cloud firmware upgrade.
- 8) Data backup and restore.
- 9) IoT.

Technical Parameters

Power supply	12V DC 1A
Current	Standby current:<120mA
RF	Operating frequency: 433MHz
	Transmit power: ~10dbm
	Receiving sensitivity: ≤ -105dbm
Wi-Fi	Coverage: about 30m indoor, 100m barrier free
	802.11 b/g/n
	Transmit power: ≤ 18dbm
	Minimum receiving sensitivity: ≤ - 95dbm
Maximum quantity of controllable devices	64
Maximum quantity of controllable scenes	16
Maximum quantity of controllable bindings	128
Operating Temperature	0-60°C
Relative Humidity	≤ 80% (Non-condensing)
Dimensions (L * W * H)	135mm×135mm×24mm
Weight	320g
